

SAFE GUARD 62F AIR & SAFE VISION AIR

Safe Guard 62F Air & Safe Vision Air are our first safety helmets of their kind in our product range—designed for full head protection and maximum comfort.

Safe Guard 62F Air is a flip-up safety helmet with grinding visor, auto-darkening filter (ADF), and ear defenders, all prepared for our air systems. It's perfect for switching between welding and grinding with ease. The Safe Vision Air offers the same protection—grinding visor and ear defenders prepared for air—but without the ADF, ideal for grinding and cutting tasks.

A key feature of both helmets: the integrated ear defenders, ensuring excellent hearing protection in noisy environments.

SAFE GUARD 62F AIR

Safety helmet with grinding visor & ADF welding flip + SNR 34 ear defenders

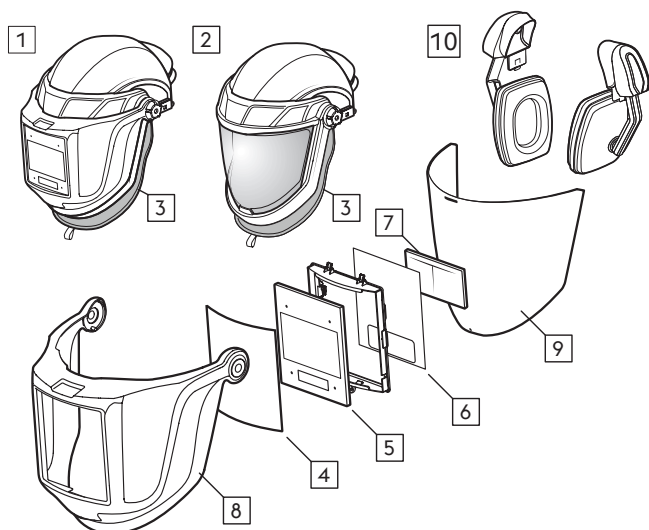

SAFE VISION AIR

Safety helmet with grinding visor + SNR 34 ear defenders

ADF SAFE GUARD 62 AIR
